

[City, Today's Date]

[Recruiter Name or "Hiring Team"]

[Recruiter Title, e.g., Lead QA / IT Recruiter]

[Company Name]

Dear [Recruiter Name or "Human Resources Team"]:

When I found the opportunity to join as [Job Title, e.g., Junior QA Tester] at [Company Name], I was immediately drawn to your focus on [Company mission or goal, e.g., building scalable, high-impact digital solutions]. During my intensive Software Quality Assurance (QA) training at TripleTen, I gained hands-on experience designing test cases, performing functional Web/UI testing with DevTools and Figma, and validating REST APIs with Postman. This role would allow me to apply my analytical rigor to deliver bug-free products and contribute to the team's growth.

I believe my profile as a QA Tester — backed by my Software Engineering background and previous experience in data and inventory auditing — gives me a unique competitive advantage for this position. My career path has taught me to spot inconsistencies quickly, prioritize accuracy, and work under agile methodologies (Scrum).

Key contributions and projects:

- REST API & Backend Testing: Designed and executed manual tests using Postman and Apidoc, validating HTTP responses (JSON) and identifying data discrepancies before release to production.
- Functional Web Testing (E2E): Evaluated critical user flows on web platforms, reporting and managing findings in Jira with detailed evidence documentation.
- AI-Driven Innovation & Efficiency: Built a custom AI agent to speed up requirements interpretation, structuring 60+ test cases and optimizing the STLC cycle.

You can review the evidence of these projects in my online portfolio: <https://brian-gz-qa.github.io/portafolio-qa/> — where you'll find test cases, bug reports, and deliverables from each bootcamp sprint.

What motivates me most about [Company Name] is your commitment to [mention a value or recent project of the company]. I'm excited about the possibility of contributing my technical skills and quality-driven mindset to ensure the excellence of your products.

I would love the opportunity to discuss in an interview how my profile and knowledge can add value to your team. Thank you in advance for your time and consideration.

Sincerely,

Brian Steven González Soto
